A world leader in gases, technologies and services for Industry and Health, Air Liquide is present in 75 countries with approximately 66,400 employees and serves more than 3.8 million customers and patients.

A world leader in gases, technologies and services for Industry and Health, Air Liquide is present in 75 countries with approximately 66,400 employees and serves more than 3.8 million customers and patients.

Air Liquide offers all industrial gases and its own gas delivery solutions which, due to its versatility, can meet the individual requirements of our customers. Our gases can be supplied as compressed single gas cylinder or bundles, in insulated cryogenic liquid trucks to storage tanks or from on-site generators. They are used in many industries, such as: metallurgy, welding and cutting, electronics, chemical, food, automotive, environment and many others.

Large production of air gases

In 1999 Air Liquide commissioned an air separation plant in Călărași, followed by an acetylene plant in Brăila and two other package gas filling centers in Buzău and Cluj-Napoca. Furthermore, Air Liquide will make a greenfield investment in Bucharest and it will own the most modern gas filling center.

Services - the experts offer

Air Liquide has developed innovative services optimizing production and cost management for customers from my industries. Our services allow customers to focus on their core activity while improving the production process. The Optimal system offered by Air Liquide - the remote control and monitoring of customer installations - increases gas supply reliability and operation of installation.

Advanced technologies

The Group's commitment to technology has kept Air Liquide at the forefront of the high-tech business of industrial gases for more than 100 years. Our objective is to fulfil customers' needs through the application of innovative and competitive solutions improving our customers' performance, safety and protect the environment.

Safety first

Safety is a key issue for Air Liquide. The goal "Zero accidents" has been our priority for many years. The Air Liquide Group has an extensive experience in the design and maintenance of safe installations and failure-free maintenance. The Safety and Risk Management Department supports projects carried out by Air Liquide at every stage.
